

AMAN KAITHWAS

Full Stack Developer

+91 7869215831 | amankaithwas57113@gmail.com | Indore, India | linkedin.com/in/aman-kaithwas-874b16163

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience designing and architecting scalable web applications and microservices platforms using React.js, Node.js, Express.js, MySQL and AWS (EC2, S3, CloudFront, RDS, IAM). Expert in building asynchronous background queues (BullMQ/Redis), video streaming pipelines (HLS/FFmpeg), robust authentication (JWT/RBAC), and database optimizations. Understanding of Agile development methodologies and team collaboration.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap, HLS
Backend: Node.js, Express.js, RESTful APIs, BullMQ, Redis Queue, FFmpeg, JWT, Puppeteer
Databases: MySQL, Sequelize ORM, Database Design & Query Optimization, TiDB
Tools & Cloud: Git, GitHub, PM2, Docker, Postman, Vercel, Render, Stripe, Twilio, OpenAI Whisper, Jira

PROFESSIONAL EXPERIENCE

Senior Software Developer | Cyber Infrastructure (P) Ltd, Indore Jun 2021 – Present

StreamVault | Video Streaming & Microservices Platform Jun 2026 – Present

- Architected an asynchronous video streaming backend by decoupling a monolithic system into 3 independent microservices (API Gateway, Transcoding Service, Notification Service) using Express.js, BullMQ, and Redis Queue.
- Engineered an automated video processing pipeline leveraging FFmpeg for HLS adaptive bitrate streaming and integrated CLI-based OpenAI Whisper for AI auto-captioning.
- Built real-time notification systems and dynamic admin dashboards using React, Redux Toolkit, WebSockets (Socket.IO), and Stripe subscription billing.

Master Admin Portal | Centralized Multi-Domain Management Platform Jan 2026 – May 2026

- Multi-Domain Platform: Architected a Master Admin Portal using JSON configs and runtime DB switching to dynamically manage multiple domain-specific sites.
- Workflow APIs & Admin UI: Built RESTful APIs for e-visa workflows and payment gateways, alongside a React admin panel with RBAC and filtering across 15,000+ records.
- Automated Processing & Docs: Scheduled Node-Cron background jobs for analytics and auto-invoicing, with Puppeteer/pdf2pic pipelines to generate receipts and process photos.
- Cloud Infrastructure & Security: Deployed on AWS EC2, S3, and RDS Aurora with auto-scaling read replicas to fix query bottlenecks, securing APIs via Helmet, CORS, and Joi.

E-Visa & E-Passport Services | Travel & Government Platform Jan 2022 – Jan 2026

- Developed a complete travel platform using Next.js, Node.js, and MySQL, building 25+ secure REST APIs with JWT authentication and Role-Based Access Control (RBAC) to improve application performance.
- Built a multi-step visa application workflow with Formik, Yup, Redux Persist, and Stripe, enabling users to save application progress, complete secure online payments, and track their orders easily.
- Improved application performance by implementing AWS CloudFront caching, lazy loading, and code splitting, while automating PDF generation and email notifications, reducing manual work and enhancing user experience and Sequelize ORM schema normalization across 20+ tables.

Media Pad | News & Content Aggregator Aug 2021 – Jan 2022

- Engineered a content aggregator platform in React.js and Node.js, consolidating real-time data feeds from 50+ media publishers into a unified feed.
- Integrated third-party booking APIs and Twilio SMS alerts; achieved strict compliance with WCAG 2.1 AA accessibility standards across 5 screen breakpoints.

EDUCATION

Bachelor of Engineering (Computer Science & Engineering)	IPS Academy, Indore	Aug 2016 – Aug 2020
Higher Secondary (12th) Secondary (10th)	State Board, Madhya Pradesh	2013 – 2016
